

# Cooking

Cooking is a fantastic way of engaging your child and gets them to use a wide range of skills; cooking covers all areas of the EYFS curriculum!

- Maths - measuring, weighing, counting, reading numbers, capacity...
- Literacy - reading recipes and amounts, writing recipes
- Communication and language - understanding and following instructions, developing interesting vocabulary
- Personal, social and emotional development - tune taking, self regulation, perseverance
- Physical development - strengthening muscles when whisking, stirring etc. coordination, precision chopping (St John's class often use knives in school to shop vegetables... give your children opportunities to undertake activities such as this whilst you are supervising them!)
- Understanding the world - the science behind cooking!
- Expressive art and design - being creative with recipes and decorations, using tools in a safe way for particular tasks.

*Don't be afraid of letting your children use knives, whisks, looking in the oven... as long as you are supervising them, these are fantastic learning opportunities and great ways of developing essential life skills!*
